About

I'm very interested about many different area such as web development,data science, image processing and designing. Also I like try and experience new Technologies. I really like to prototype and think about UI.
I was designing advertisement videos and logos, mockups and also working on image processing ; but after thinking to build a web application started to learn and improve on it.I also like cooking,Art,Philosophy and cinema.
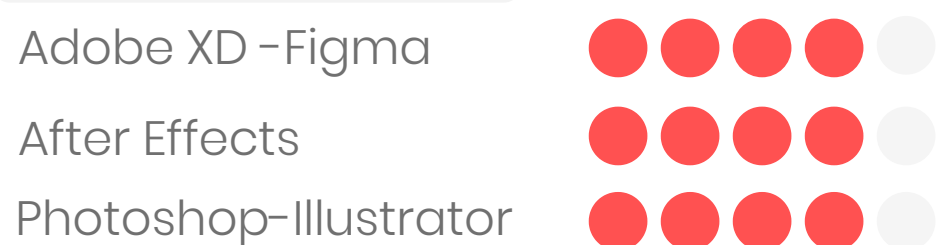

Skills

Languages

Javascript(ES6+)
Python
C/C++

Web-Tech-Kit

HTML/CSS
Bootstrap-Bulma
Vue
Node,Express
MongoDB

Design Programs

Adobe XD -Figma
After Effects
Photoshop-Illustrator

Experience

I have 2 web Projects going on and I'm working on them both are internet based and MEVN (Mongo,Express,Vue,Node)Stack is used.

I'm want to learn AWS services and, docker and want to improve my DevOps side.

Taking courses on Machine Learning and Neural Networks and trying to implement Neural networks from scratch with Python. (Perceptron,Adaline,Multilayer backprogation,Kohonen)

Intern at Softtech(2020)
-Junior software developer

Education

2016-2021
Bachelor of Science in Electronics and Communication Engineering
Istanbul Technical University
